Art Unit: 1774

1. The preliminary amendment filed January 14, 2004, which amends the title and specification, cancels claims 1-24 and adds claims 25-42, has been entered.

Claims 25-42 are pending.

2. The disclosure is objected to because of the following informalities:

The symbols " η_{INT} " and " η_P " which appeared in the first full paragraph on page 30 of the original specification have been changed to -- h_{INT} -- and -- h_P -- in the replacement paragraph set forth in the preliminary amendment.

Appropriate correction is required.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 25-42 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 and 11-17 of U.S. Patent No. 6,692,820 and as being unpatentable over claims 1-7 of U.S. Patent No. 6,451,415.

Art Unit: 1774

Although the conflicting claims are not identical, they are not patentably distinct from each other because, in order to make the devices of the patented claims, one must necessarily carry out the "depositing" steps of the presently claimed method and, in carrying out the method of the present claims, one makes devices according to the patented claims.

5. Miscellaneous:

Applicant is respectfully reminded to update the status of copending applications cited in the specification which have become patented or abandoned.
